Ingenious Solutions (Feb 2022 – Present)

JR. Software Developer

Bittern Technologies(Aug 2020 – Jan 2022)

PORTFOLIO

PROJECT: PATIENTIQ <https://app.patientiq.io>,

ROLE: Ruby on Rails Developer | Full-Time Remote

DESCRIPTION: PatientIQ is a HIPAA-compliant, cloud-based application that seamlessly integrates clinical data, patient-reported outcomes, and academic research to provide analytics for the various stakeholders in the healthcare ecosystem.

Worked on: Rails 4.2, Bootstrap, Postgresql

Responsibilities:

- > Designed the whole MVC structure for patient.patientiq.io from scratch
- > Feature(Capybara) and Rspec test cases
- > Implemented REST APIs for <https://app.patientiq.io> to connect with patient.patientiq.io

PROJECT: ATMAGO www.atmago.com

ROLE: RUBY ON RAILS DEVELOPER

DESCRIPTION: AtmaGo is an Indonesian free website and app that one can use it to report problems, share solutions, find jobs, and post news about your neighborhood. AtmaGo is created with the idea and spirit of "citizens of citizens" to create a better environment from below. Configured nginx on EC2 instance and developed deployment script with Capistrano to deploy the project.

Worked on: Rails 5, MySQL

Responsibilities:

- > Configured nginx on EC2 instance and developed deployment script with Capistrano to deploy the project.
- > Speed optimization by improving the overall code quality and enabling compression through Nginx.
- > Rails up-gradation from Rails 3 to Rails 5
- > EC2 Server Setup
