

SHREYA SHIRKE

Ruby on Rails Developer | 5+ Years Experience | APIs | AWS | TDD | Remote

Ph. [8770638354](tel:8770638354), shirkes088@gmail.com, Skype: [live:.cid.60d25c9856b85acc](skype:live:.cid.60d25c9856b85acc)

Professional Summary

Ruby on Rails Developer with 5+ years of experience building scalable web applications, RESTful APIs, and high-performance systems. Strong expertise in backend architecture, AWS deployments, and test-driven development. Proven ability to improve application performance, optimize code, and deliver production-ready solutions in remote environments.

Technical Skills

Backend & Core

- Ruby, Ruby on Rails, RESTful APIs, MVC Architecture

Frontend

- JavaScript, HTML5, CSS3, Bootstrap, jQuery, SASS

Databases

- PostgreSQL, MySQL, MongoDB

Testing

- RSpec, Capybara, Cucumber, FactoryBot

DevOps & Deployment

- AWS (EC2, Elastic Beanstalk), Nginx, Capistrano, Heroku

Integrations

- Stripe, PayPal, Social Media APIs

Tools

- Git, Bitbucket, Jira, Trello, Pivotal Tracker

Professional Experience

Ruby on Rails Developer (Remote)

Ingenious Solutions | Feb 2022 – Present

- Designed and developed scalable backend systems using Ruby on Rails
- Built and optimized RESTful APIs for seamless frontend and third-party integrations
- Improved application performance through code optimization and efficient database queries
- Implemented test coverage using RSpec and Capybara to ensure code reliability
- Managed deployments on AWS (EC2, Beanstalk) with Nginx and Capistrano
- Collaborated with cross-functional teams in a remote environment to deliver features on time

Junior Software Developer

Bittern Technologies | Aug 2020 – Jan 2022

- Developed and maintained web applications using Ruby on Rails
- Assisted in upgrading legacy applications to newer Rails versions
- Worked on database design, bug fixing, and feature enhancements
- Supported deployment and server configuration processes

Key Projects

Confidential – Telecom Subscription & Billing Platform

- Developed and maintained Ruby on Rails backend applications supporting subscription and billing workflows across web portals, websites, and payment gateways.
- Implemented subscription lifecycle management including activation, renewal, termination, refunds, and billing state processing.
- Developed REST and Rack APIs for integration with internal systems and external telecom, billing, payment, and content service providers.
- Implemented payment callback processing, customer notifications, SMS integrations, and customer lifecycle workflows.
- Developed asynchronous background jobs using Sidekiq and Redis to support scalable and reliable backend processing.
- Worked with subscription contracts, billing workflows, payment callbacks, and customer lifecycle events.

PatientIQ

<https://app.patientiq.io>

- Developed a HIPAA-compliant healthcare analytics platform

- Architected scalable MVC structure for handling clinical and patient data
- Built REST APIs for data integration between systems
- Implemented automated test cases using RSpec and Capybara
- Improved system efficiency and data handling capabilities

Tech Stack: Rails 4.2, PostgreSQL, Bootstrap

AtmaGo

<http://www.atmago.com>

- Contributed to a community-driven platform for reporting issues and sharing local updates
 - Led Rails upgrade from version 3 to 5, improving performance and maintainability
 - Configured Nginx and deployed application on AWS EC2 using Capistrano •
- Optimized application speed through code improvements and server tuning

Tech Stack: Rails 5, MySQL, AWS

Education

Master of Computer Applications (MCA)

Amity University Online | 2023 – 2025

Bachelor of Commerce (B.Com)

Jiwaji University | 2016 – 2019

Additional Strengths

- Strong problem-solving and debugging skills
- Experience working in remote teams
- Focus on writing clean, maintainable, and scalable code
- Quick learner with adaptability to new technologies

I would love to discuss how my skills and experience align with your needs. Please don't hesitate to contact me.

Thanks,
Shreya Shirke
